

Data Dictionary

data/raw/marketplace_disclosures.csv

Field	Description
company	Swiggy, Nykaa (FSN E-Commerce), or Eternal (Zomato/Blinkit)
segment	Business segment, where disclosed separately
period	Fiscal period the figure covers
metric	Plain-language name of the disclosed figure
value, unit	The figure and its unit (INR_crore, pct)
metric_type	The field that drives the benchmark logic - see below
source	Citing report/press outlet
notes	Scope, caveats, or why a figure was excluded

metric_type values

Value	Meaning
gov_gmv	A directly disclosed scale figure - usable as the benchmark's denominator
ad_revenue_pct_of_gov	A disclosed, current, standalone ad-revenue-as-%-of-GOV figure - the only kind used to compute an implied revenue number
ad_revenue_pct_of_gov_TARGET	Same, but explicitly a forward-looking target, not a current actual - used, but always labelled as a target
ad_SPEND_not_ad_revenue_EXCLUDED	The company's own advertising <i>spend</i> - recorded to document the distinction, never used in the benchmark calculation
bundled_revenue_not_ad_only	A revenue line that bundles ads with other services - not usable as a pure ad-revenue figure
blended_take_rate_not_ad_only	Commentary attributing take-rate growth partly to ads, without a standalone figure - directional only
revenue	Company/segment revenue, not the same as GOV/GMV

outputs/tables/monetization_benchmark.csv

One row per company/segment with a disclosed GOV/GMV figure. `ad_revenue_pct_of_gov` and `implied_ad_revenue_inr_crore` are either a real computed figure or the literal string `INSUFFICIENT_DISCLOSURE`.
